VIJ INTERIOR DECORATOR

UV MARBLE SHEET PVC MICA

UV Marble Sheet is a 'Ultraviolet' looking sheet which gives a sophisticated and simple look to interior. It is suitable for most building applications for fitting in floors. Textile items can be used to provide protection to a product or wearer from UV radiation, but to do so effectively the textile requires the ability of resisting UV transmission through the constituent fibers or the penetration of the radiation through the fabric interstices. This means the fibers themselves should be UV resistant and the fabric structure should have good but low optical transparency.

We are placed among the noteworthy organizations, engaged in offering high quality UV Marble Sheet. The offered panel is precisely designed using the premium grade polyvinyl chloride and new techniques under the supervision of our experts. The offered panel is extensively used in homes, hotels, offices and other places to provide mesmerizing look. Furthermore, the provided panel is available in various sizes and designs for our clients.

**DIGITAL UV SHEET
GL 302**

**DIGITAL UV SHEET
GL303**

The image shows a rectangular sheet of material with a complex, marbled pattern. The pattern consists of swirling, organic shapes in black, white, and a vibrant gold or yellow color. The sheet is laid out on a green, textured surface that resembles artificial grass. The overall appearance is that of a decorative or functional material, possibly a UV-protective sheet for outdoor use.

**GLS UV MARBLE SHEET
GL311**

A rectangular sheet of digital UV marble with a complex, organic pattern. The pattern features swirling shades of light blue, dark grey, and black, interspersed with irregular, vein-like streaks of gold. The sheet is laid flat on a green, textured surface, possibly a carpet or mat. The text "DIGITAL UV MARBLE SHEET" and "DG 223" is printed in a bold, black, serif font in the center of the sheet.
